

Dr. Rohied Mokiem joined MIcompany as a partner in May 2016. He is a big-data-specialist avant-la-lettre and a thoroughbred forecaster. He made his first impact with big-data analyses as an astrophysicist at the University of Amsterdam developing innovative modelling approaches by combining very large datasets, super computers and advanced algorithms. Thanks to the breakthroughs this pioneering approach created, Rohied was awarded his doctoral degree cum laude. During his time at the University of Amsterdam he also advised other universities on large scale data analysis projects.

In addition to his scientific background Rohied brings a decade of strategy consultancy experience to MIcompany. As an associate partner at OC&C Strategy Consultants he gained a high level of experience with the different aspects of corporate strategy, business development, and strategic realization. He worked in many different industries cracking a large variety of data driven issues to help create value for clients. For instance, by predicting customer demand and revenue streams, improving the competitive position in digitising markets and realising strategic cost advantages.

At MIcompany Rohied puts his scientific background and business expertise to use in the modelling services of the company. Among other things he focuses on forecasting to help companies find new growth pockets, optimise asset utilisation, and find new business opportunities.

Rohied holds an MSc in computation astrophysics and obtained a PhD in astronomy in 2006 from the University of Amsterdam. He lives in Amsterdam with his wife and son.
